

One platform. Everything your revenue team needs.

Stop paying for tools your team uses 30% of.

SenPro for Teams combines training, AI roleplay, pipeline intelligence, and management insights in one place so adoption goes up and tech stack sprawl goes away.

Closed-Loop AI Roleplay

Capture calls, turn them into practice. Reps train on real conversations from your team's own pipeline, not generic AI scenarios.

Assign Coaching With Deadlines

Identify a gap and fix it that week. Assign expert-led sessions to specific reps, track completion, and close the loop before the next call.

Team Management and Insights

Add and remove users, view team leaderboards, and export reports that actually tell you what is happening with performance and pipeline health.

Call Insights Across the Team

Understand what your top reps do differently. Track call outcomes, spot patterns across the team, and coach with evidence not instinct.

For leaders who want more than just another tool to ignore.

Sales Managers: Coach your team with data, not guesswork. Spot trends and address gaps with real-time call insights.

Revenue Leaders: Scale performance with full visibility across every deal and every rep in the team.

Sales Ops: Simplify your stack. Replace manual reports and scattered tools with one platform that does it all.

Customer Success: Build training from real renewal calls and escalations. Reduce churn by making great CS repeatable.

One platform. No more tech stack sprawl.
